A gateway into
the world of a film.

PROFILE

Graphic and motion designer specialising in the design and production of title sequences for film and television since 2001.

Working closely with directors, I create graphic worlds and title sequences that extend the identity of the film and guide the audience into the story.

Between typography, animation and compositing, I design openings that set the tone of a film from its very first seconds. From graphic research to final delivery, I handle the entire creative process.

60+ title sequences designed

8 films with Claire Denis

7 films with Benoît Jacquot

SERVICES

- Title sequences — from first sketch to final delivery
- Compositing
- Motion design
